DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to polypeptides, classified in class 530, subclass 350.
- II. Claims 3-7, drawn to a method of diagnosis, classified in class 424, subclass 9.1.
- III. Claims 8 and 9, drawn to methods of identifying and producing modulators, classified in class 424, subclass 7.1.

The inventions are distinct, each from the other because of the following reasons:

The polypeptides of Invention I are not related to the methods of Invention II. They cannot be used in or detected by these methods.

The polypeptides of Invention I are distinct from the methods of Invention III because they have other uses, such as the generation of antibodies.

The methods of Invention II are not related to those of Invention III. They require different reagents and have different goals, different method steps, and different outcome measures.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for the different groups are different, restriction for examination purposes as indicated is proper.
